

Answer content work flow

Answer content flow

Users

- Select one of AIT' schools(SET, SOM, SERD), next choose which department of the school and then select one of its courses with specific semester.
- The system automatically checks if the related exam question contains in the database. If there is no the related question, users are not able to post its answer.
- If there is the related question available, so users upload and then wait for approval.
- After a administrator confirmed, the uploaded file will be stored both in the website's database and post to the related Facebook group's wall.

Administrators

- Select one of AIT' schools(SET, SOM, SERD), next choose which department of the school and then select one of its courses with specific semester.
- The system automatically checks if the related exam question contains in the database. If there is no the related question, they are not able to post its answer.
- If there is the related question available, the system's administrators can upload.
- The uploaded file will be stored both in the website's database and post to the related Facebook group's wall.
