

## **User feedback to our Website**

I talked with one of the student from Gender Development Studies to discuss about our website. She found our website useful, very easy to navigate and also complemented on the simple design. She said it was time saving for her as she don't have visit library and get all the contents in our website.

She didn't like that we don't have email validation but we assured her that we would implement it before it semester is over. She also asked why their no courses of her field, we assured her that we will add them as soon as possible.

Finally she said that she would definitely use this website if it is live and said best of luck of our project.
